

## CONDENSED CLIMATOLOGICAL SUMMARY.

In the following table are given, for the various sections of the Climatological Service of the Weather Bureau, the average temperature and rainfall, the stations reporting the highest and lowest temperatures with dates of occurrence, the stations reporting the greatest and least monthly precipitation, and other data, as indicated by the several headings.

The mean temperatures for each section, the highest and

lowest temperatures, the average precipitation, and the greatest and least monthly amounts are found by using all trustworthy records available.

The mean departures from normal temperature and precipitation are based only on records from stations that have ten or more years of observations. Of course the number of such records is smaller than the total number of stations.

Temperature and precipitation by sections, February, 1910.

Section.	Temperature—in degrees Fahrenheit.								Precipitation—in inches and hundredths.								
	Section average.	Departure from the normal.	Monthly extremes.				Section average.	Departure from the normal.	Greatest monthly.				Section average.	Departure from the normal.	Least monthly.		
			Station.	Highest.	Date.	Station.	Lowest.	Date.	Station.	Amount.	Station.	Amount.	Station.	Amount.	Station.	Amount.	
Alabama	45.8	- 1.1	2 stations	80	27	Riverton	- 4	12	Auburn	7.97	Goodwater	2.55					
Arizona	47.9	- 0.8	Fort Mohave	90	28	Flagstaff	- 13	3	Flagstaff	6.88	32 stations	2.55
